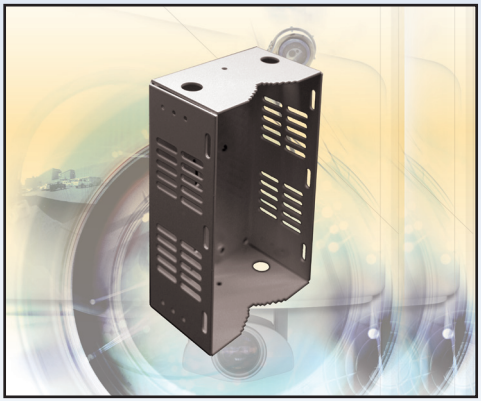
dotworkz systems

Versatility & Protection from Every Angle

Dotworkz BR-MPM2 Pole Mount Extended Bracket is compatible with both the D2 and D3 housings, and is pole mount ready with hardware included.

This non-corrosive, powered-coated aluminum bracket is ideal for mounting camera systems to post or poles, and allows for the integration of antennas, beacons, strobe-lights, and other components for customized deployments.

BR-MPM2 : Dotworkz Pole Mount Extended Bracket



Features:

- Compatible with Dotworkz D2 & D3 Enclosures
- Can be mounted to any size structural post or pole
- Space available to integrate electrical & junction boxes
- Non-corrosive, powder-coated aluminum
- Mounting hardware for Dotworkz housing systems provided
- Additional components (antennas, beacons, strobe-lights, etc.) can be easily incorporated for customized deployments

Description:

The BR-MPM2 Pole Mount Extended Bracket provides a quick mount attachment at the rear of the Dotworkz D-Series enclosures. The bracket can be mounted onto any size structural post or pole utilizing 3-band straps. The Extended Pole Mount Bracket creates distance at the post or pole for an extended viewing angle, and has space available to integrate electrical and junction boxes.
